# Structured capture of your online content

Update your media review with today's news!

Digital content quickly saved

Not only the link, but the whole article

Show diversity in your media review

Online, Social Media, Radio/TV, dpa, PMG, Factiva ...

Work auto-manually

Import filter for automated transfer

Capture online articles, radio/TV and social media contributions - easily and conveniently. Together with print articles, this creates a brand-new overview of your media review topics!

webcapture facilitates the structured capture of digital articles by source, date, category, including full-text. You can also create and record links to audio and video files quickly.

Additional import filters for different content providers automatically transfer content filtered by keyword into your newsweb media review software.

Save time and money!
